Technical Skills and Interests

Skills: Python, Numpy, Pandas, Kubernetes, Helm, Docker, Git, Linux, Bash, GCP, Celery, MongoDb, C/C++
Exposure: AWS, Azure, Go, Rust, Javascript, SQL, Windows subsystem, HTML, CSS, Nodejs
Areas of Interest: Cloud infrastructure, Computational theory, Performance Engineering, Machine Learning

Experience

- **Docsumo** *Kathmandu*
  Python Engineer Jan 2023 - Present
  - **Devops:** Management of multi-tenant kubernetes cluster. Responsible for transferring CICD pipelines from gitlab to github. Setup automated provisioning/deprovisioning of cluster resources to deploy fully fledged deveploment server for easier dev collaboration.
  - **SRE:** Member of production incident first responders and overlooked multiple releases for early production faults
  - **Visibility:** Worked in integration of json loggers and tracing systems to GCP deployment for better visibility.
  - **Software Engineering:** Responsible for development and maintainance of end to end integration testing framework for the whole of product. Worked on adding new features and architectural refactoring of legacy codebase of the product.

- **Yasok Systems** *Kathmandu*
  Software Engineer Feb 2022 - Dec 2022
  - **Devops:** Worked in integration and deployment of enterprise search in Elasticsearch and Azure.
  - **Software Engineering:** Implemented website wide search system in customer's website using in python.

- **Fusemachines.AI** *Kathmandu*
  AI Fellow Sep 2022 - Dec 2022
  - Completed Microdegree on Machine Learning and Deep Learning.
  - Learned to leverage different techniques and models to understand data.

Certifications

- Qbit by Qbit Intro to Quantum Computing by IBM Quantum
- Winter school in AI by NAAMI Nepal
- AWS Cloud Foundations by AWS
- Micro degree in Machine Learning By Fusemachines

Personal Projects

- **Intellegent Document Processing** *2023*
  Worked on making the overall backend of the website. (Python, Fastapi)
  - Takes in images of documents like invoices and outputs structured information like billing details and total.

- **Realtime text similarity Identification** *2021*
  Mainly worked on researching and testing different encoders for better accuracy and maintaining the backend (Python, Flask)
  - Uses methods like averaging, smooth inverse frequency and sentence Transformers to detect similarity between two piece of texts. Designed to aid professors in non repetitive question preparation for exams

- **Hardware/Software Accelerated 3D Renderer** *2020*
  Personal Project (C++, OpenGL)
  - Renderer from scratch which can render any 3D model (.obj file). The software renderer uses primitive algorithms used by low level graphics driver to render triangles.

- **Sorting and Pathfinding Algorithms Visualizer** *2020*
  Personal Project (C++, SDL)
  - Can be used as teaching aid for sorting and pathfinding algorithms. Visualizes multiple sorting, pathfinding and graph spanning tree algorithms.

Education

- **Tribhuvan University IOE, Pulchwok Campus** *2023*
  Computer Engineering Percent: 72%
  Courses: *Operating Systems, Theory of Computation, Data Structures and Algorithms, C, OOP using C++, Artificial Intelligence and Machine Learning, Networking, Databases*

- **St.Xaviers College, Maitighar** *2018*
  +2 in Science CGPA: 3.52
  Courses: *Physics, Chemistry, Biology, Maths, English*
